About Us

DeepG is a forward-thinking AI development startup committed to transforming businesses into AI-driven powerhouses. We specialize in creating custom AI solutions tailored to the unique needs of startups, enterprises, and global organizations.

At **DeepG**, we believe AI should not just be a tool, it should be a trusted partner that empowers organizations to make smarter decisions, optimize operations, and unlock new opportunities for growth.

DeepG develop intelligent AI that adapt to client demands, enabling businesses to seamlessly integrate AI into their workflows. Alongside development, we provide AI consultancy to guide organizations through the journey of becoming fully AI-powered.

Vision

We envision a world where Artificial Intelligence is seamlessly woven into the fabric of every organization, acting as an intelligent ally that drives progress, creativity, and opportunity. DeepG strives to become a global leader in AI-powered agents, setting the standard for how businesses operate smarter through intelligent automation, communicate better with adaptive AI interactions, and scale faster by leveraging data-driven insights and decision-making.

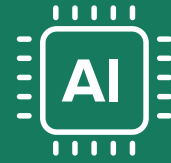

Our vision is not just about technology, it is about building a future where AI empowers humanity, helps businesses achieve limitless growth, and creates a smarter, more connected global economy.

At DeepG, our mission is to redefine the future of work and business through Artificial Intelligence by empowering organizations of every size, from agile startups to global enterprises with custom-built AI solutions and intelligent agents that not only optimize processes but also unlock new realms of possibility. We are driven to transform businesses into AI-driven pioneers, enable leaders to make faster and more impactful decisions, and build AI systems that are powerful, responsible, ethical, and sustainable.

Our mission is simple yet bold: to turn AI into a true growth partner that fuels innovation, creates efficiency, and ensures long-term resilience in a rapidly evolving digital landscape.

Mission

What We Do

Custom AI Solutions

Tailor-made AI agents and automation tools.

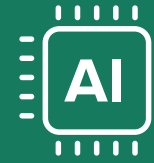

AI Consultancy

Helping businesses adopt and scale AI effectively

Enterprise AI Integration

Streamlining workflows with intelligent automation

AI Product Development

Building flagship AI-driven platforms that lead industries.

Product Portfolio

01

QuantMango

Smart Data, Trusted Insights

A reliable internal data analysis platform that turns natural-language questions into accurate, hallucination-free insights. Bilingual, sovereign and ISO-aligned. Built for organizations that cannot compromise on data privacy.

KEY CAPABILITIES

01

Natural Language Data Analysis

02

Multi-Format & Large File Handling

03

Cloud Database Integration

04

Dynamic Dashboards & Reports

05

Bangla & English Bilingual Support

06

Multi-Turn Conversational Queries

07

Hallucination-Free Insights

08

ISO-Certified Operations

09

Sovereign On-Premise Deployment

10

Secure & Private by Design

02

GridPanda

Make Your BOQ in Minutes

An AI assistant for civil and electrical engineers that reduces days of estimation work to minutes. From cost projections to executing AutoCAD commands, while complying to multiple national building codes.

KEY CAPABILITIES

01

Electrical Cost Estimation

02

Raw Material Costing

03

Labour Cost Calculation

04

Project-Specific Cost Definition

05

Natural-Language AutoCAD Control

06

Multi-Country Code Compliance

07

BOQ Generation in Minutes

08

Audit-Ready Documentation

03

Queryo

Unified Models. Amplified Intelligence.

An enterprise multi-model AI workspace that consolidates the world's leading LLMs into a single governed environment by combining premium access, deep research, flexible billing, and enterprise governance for teams that need to move fast without losing control.

KEY CAPABILITIES

01

Multi-Model AI Workspace

02

Enterprise Console & Governance

03

Team, Roles & Invitations (RBAC)

04

Organisation Credit Pool

05

Real-Time Streaming Responses

06

File & Image Attachments

07

Code & HTML Live Preview

08

Content Generation (Image, Video, Audio and Slides)

09

Personal & Enterprise Billing

10

SSO, OTP & Session Controls

04

Stockivo

Complete POS & Inventory System

Cloud-native point-of-sale (POS) and inventory infrastructure for modern retail. Sell faster at the counter, track stock in real time across locations, manage suppliers, and understand your business from any device, anywhere.

KEY CAPABILITIES

01

Universal POS Interface

02

Instant Search by SKU or Barcode

03

Multi-Method Payments

04

Customer Profiles & Loyalty

05

Real-Time Multi-Location Inventory

06

Batch & Expiry Management

07

Bulk Product Import / Export

08

Purchase Order Workflow

09

Sales Analytics & CSV Export

10

Role-Based Team Access

05

AcademyOS

The Operating System for Modern Training Institutes

A ready-to-deploy management platform for academies, coaching centres, and training institutes. Replaces spreadsheets and manual processes with one organised system serving every stakeholder from general users to administrators.

KEY CAPABILITIES

01

Branded Public Website

02

Student Self-Service Portal

03

Online Examinations

04

Automated Certificate Generation

05

Integrated Payments & Invoicing

06

Batch & Location Management

07

Attendance Tracking

08

Instructor Portal

09

Comprehensive Reporting

10

Content Management System

06

SupportIQ

The Customer Service AI Agent That Actually Closes

An enterprise-ready AI agent that meets customers across messaging, voice, and web. It also resolves their requests by end-to-end support. Beyond Q&A, SupportIQ understands product imagery, books meetings, places orders, and acts as a personal assistant for staff.

KEY CAPABILITIES

01 Multi-Channel Deployment

02 Multi-Modal Interaction

03 Autonomous Customer Handling

04 Visual Semantic QA

05 Live Database & Sheets Integration

06 Order & Meeting Automation

07 Personal Assistant Mode

08 Context Continuity

09 Human Handoff

10 Enterprise-Grade Security

07

DeepCommerce

Commerce Infrastructure, Engineered for Growth

Full-stack e-commerce engineered with security-first architecture that helps storefront, payments, courier, and communications, plus optional WhatsApp commerce, 3D product display, and social media management add-ons for organisations ready to scale.

KEY CAPABILITIES

01 **Branded Storefront**

02 **Payment Gateway Integration**

03 **Courier Service Integration**

04 **Email & SMS Integration**

05 **Voice Order Confirmation**

06 **Built-in Client Support**

07 **Security-First Architecture**

08 **WhatsApp Commerce (Add-on)**

09 **Customize Design in 3D view (Add-on)**

10 **Social Media Management (Add-on)**

Custom AI Solutions & Software

Built to Your Specification. Engineered for Your Industry.

Beyond our flagship products, DeepG operates as a strategic engineering partner for organisations with bespoke requirements. From single-purpose AI agents to multi-agent platforms and full-stack software systems, we deliver production-grade solutions with the rigour, security posture, and ethical standards that define our portfolio.

Custom AI Agents

Single or multi-agent systems engineered for your specific workflows.

Bespoke AI Solutions

Proprietary models, fine-tuned LLMs, and domain-specific intelligence pipelines.

Full-Stack Custom Software

End-to-end product development from architecture through deployment.

AI Strategy Consultancy

Roadmap design, opportunity assessment, and transformation planning.

Sovereign Deployment

On-premise and private-cloud delivery for regulated environments.

Ethical & Responsible AI

Transparency, fairness, and accountability built into every system.

Our Values

Five principles that govern every engagement, every product, every line of code.

Innovation First

Pushing the boundaries of AI to define categories rather than follow them.

Client Centric

Every solution engineered to fit our client's unique context, never the other way around.

Scalability

Products evolve with your business — a clear path from pilot to enterprise scale.

Transparency

Trust through clear communication, measurable outcomes, and full system visibility.

Ethics in AI

Fairness, accountability, and sustainability — non-negotiable foundations of our work.

Why DeepG

A combination of capability, posture, and partnership uncommon in the market.

01 Production-Grade AI

Every product is deployed, scaled, and battle-tested — engineered for the realities of enterprise operation.

02 Sovereign Data Posture

Fully on-premise and private-cloud deployment. Your data never leaves your environment unless you choose otherwise.

03 Multi-Modal by Design

From voice agents to vision-grounded analytics, our systems are built for the channels your customers and teams already use.

04 Bilingual & Multi-Region

Native Bangla and English support, multi-country compliance, and deployment patterns built for global operation.

05 Engineering Discipline

ISO-aligned operations, hallucination-free analytics, security-first architecture, full audit traceability.

06 Ethical AI Commitment

Responsible AI is the operating philosophy that governs how we design, build, and deploy — not a marketing line.

Engagement Model

Three structures designed to match your pace, scope, and risk profile.

01 Product Licensing

Deploy DeepG flagship products under flexible per-seat, per-organisation, or enterprise licence models.

- QuantMango
- GridPanda
- Queryo
- Stockivo
- AcademyOS
- SupportIQ
- DeepCommerce

02 Custom Engineering

Bespoke development of AI agents, custom software, or extended platform modules — engineered to your specification.

- Custom AI Agents
- Domain LLM Fine-Tuning
- Full-Stack Software
- Systems Integration
- On-Premise Delivery

03 Strategic Consultancy

AI roadmap design, opportunity assessment, and transformation advisory — typically a precursor to product or custom engagements.

- AI Strategy
- Opportunity Mapping
- Transformation Roadmaps
- Vendor & Tech Evaluation
- Governance Design
